

AIPHONE

IX series certified with OmniPCX Enterprise™ & OXO Connect™

AIPHONE®

Utilizing the intercom's SIP communications technology, IX Series 2 master stations can forward calls to an external phone number.

Integration Overview:

IP-PBX integration enables the IX System to be used as a part of the internal telephone network. Make receive and transfer calls, answer visitors and release doors.

Integration Details:

A station may call a single, (which can be a direct phone number, based on OXE/OXO settings). This extension can be that of a single station, or a hunt/call group. If the destination of a call is a hunt/call group, OXE/OXO will then distribute the call to the appropriate group of extensions.

Door Release

IP phones registered to OXE/OXO can activate an IX Series station's relay output used for door release via its dial pad or a configured soft button (if available).

Note that IX Series master stations have their own method of activating door release, which is automatically enabled.

Call transfer

Call transfers from one IX Series station to another, or to a single SIP extension, is handled by its internal configuration. Call transfers of an IX Series station from an IP phone to another is handled by OXE/OXO.

IX Series stations have three internal call transfer options; Absent, Delayed, and Scheduled.

For more information on this feature and its configuration, reference the IX Series 2 Quick Start Guide.

Aiphone Co. Limited in Nagoya, Japan exports to over 60 countries.

Aiphone Corporation is the Sales, Marketing and Distribution center for North America, and Aiphone S.A.S. is their sales and Distribution center for the European market

CAUTION: This validation provides customers with confidence that a partner's integration with an Alcatel-Lucent Enterprise on-premises platform is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

However, be aware, this document is associated with an InterWorking Report (IWR) available on the ALE Business Portal which give all possible restrictions and limits.
