Alcatel-Lucent Enterprise Network Fleet Supervision
Network inventory & Support visibility made easy for Customers and Fleet Managers

Free of charge online tool - Self signup approach

Secure your business with a support and software compliance tool

Fleet Supervision

Supervise your network device fleet from a single, easy to use platform

- **Take inventory** of all OmniSwitch® and OmniAccess Stellar® devices for asset management purpose and confirm **proper support entitlement status**

- Visualize key information related to a set of devices for a **proactive service and support management**

- Track **hardware lifecycle** and plan budget for replacement (end of sales, end of life)

- Check current software version and **plan proactive updates**

**Cut operational costs and streamline support services through real-time device visibility**

Take control of your network from a single dashboard — stay ahead with smart updates and timely hardware refreshes

Enterprise

ALE Fleet Supervision

Empowering end customers with Support Entitlement visibility and software compliance

- **Automatic asset inventory** - Display devices managed by several OmniVista management systems

- Manual option to **import serial numbers** for unmanaged devices or assets behind firewall

- **Inventory management** with drill down and sorting flexibility

- **Key info** - Summary and detailed view of OmniSwitch chassis, power supplies, transceivers and OmniAccess Stellar access points

- **Service/support status**, device lifecycle warranty, software version

Asset Collection

Software Version Visibility

Inventory Visualization

Dashboard & KPIs

- Instant visibility on **software running version**

- **Assess and control your compliance** (e.g. NIS2)

- **Service & support entitlement ratio**

- **Device lifecycle & warranty ratio**

- All **software versions** displayed at a glance

- Easy **report** exports

All of your network assets at your fingertips

Your service and maintenance status at-a-glance

Software updates made easy, simplifying software versioning
