

CECIAA

WINTEL certified with IPDSP, PIMPhony & 4059EE

The company offers braille and low vision solutions for OXO and OXE platforms. The product is called "Wintel" with the reference of the operator station behind.

Integration Overview:

The solution includes a hardware part and a software part

The hardware part is a braille display that will allow the operator to read the information by placing his finger on the braille display and read the information we send with the software solution.

The "**Wintel**" software part consists of a screen reader part and a read script that interfaces with the specific telephony solution. This interface retrieves the information on the screen and displays it on the Braille display. Software part.

- Wintel 4059 EE
- Wintel PIMphony
- Wintel IP Desktop SoftPhone

Braille display part: FOCUS Braille Terminal 40 characters

Integration Details:

Braille solution 4059 EE:

You need a computer with a Windows interface with the Alcatel keyboard and the Alcatel 4059 EE interface.

Locally, we install the screen reader, the FOCUS braille terminal and the WINTEL accessibility layer.

IP Desktop SoftPhone Braille Solution:

Company Overview:

For more than 30 years, the company has specialized in adapting the telephone reception service. We offer solutions for the visually impaired and the blind.

Our solutions adapt to the needs of each operator and can be customized according to the needs.

CAUTION: This validation provides customers with confidence that a partner's integration with an Alcatel-Lucent Enterprise on-premises platform is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

However, be aware, this document is associated with an InterWorking Report (IWR) available on the ALE Business Portal which give all possible restrictions and limits.
