

Fondazione Città della Speranza changed the communication thanks to Alcatel-Lucent: today its long-distance communication is more efficient

FONDAZIONE CITTA' DELLA SPERANZA - PADOVA

CHALLENGES

- Converged network infrastructure more efficient for the management of the laboratory, diagnostic imaging and video streaming applications
- Wiring of the whole structure to implement a fiber backbone 10G (Data Center) able to support a high level of traffic
- WiFi coverage of the Tower, OmniPCX Enterprise installation and costs reduction

PRODUCTS & SOLUTIONS

- Alcatel-Lucent OmniSwitch 9700 e 6400
- Alcatel-Lucent OmniAccess WLAN 4704
- Alcatel-Lucent OmniVista 2500/2700 NMS
- Alcatel-Lucent OmniPCX Enterprise
- Alcatel-Lucent OmniTouch 8082 My IC Phone

BUSINESS & TECHNICAL BENEFITS

- Ability to share information, research, medical examinations and medical records, making them available in digital format to all teams, from laptop or smartphone
- Faster remote displaying of large diagnostic images
- Increased mobility and collaboration
- Ability to attend meetings in video streaming thus facilitating the research
- Excellent quality/price ratio of the implemented solution

DEAL FACTS & FIGURES

- Deal won date: 2011
- Implementation date: 2011
- Business Partner: EDSlan

"Thanks to Alcatel-Lucent technology, seen at the Demo Center in Vimercate, and to the competence and professionalism of EDSlan, we implemented an innovative infrastructure that will allow doctors and researchers to access patients' clinical data and will represent a fundamental support in the daily study of cancer and leukemia."
