

# Clark Memorial Hospital's World-Class Healthcare Service is Enabled by Alcatel-Lucent's Network Infrastructure

## CLARK MEMORIAL HOSPITAL

### CHALLENGES

- Grant care providers mobile access to clinical data in a fast, reliable and secure way that ensures the integrity of patient data and deliver on service expectations
- Provide the same level of network services for both the main hospital and remote sub-acute facilities, to comply with government mandates and deploy electronic health records in a meaningful way

### PRODUCTS & SOLUTIONS

- Alcatel-Lucent OmniSwitch™ 6850E Stackable LAN switches
- Alcatel-Lucent OmniSwitch™ 9800E series switches
- Alcatel-Lucent OmniAccess™ AP105 and AP135 Wireless LAN Access Points
- Alcatel-Lucent OmniAccess™ 6000 Wireless LAN switch
- Alcatel-Lucent OmniVista™ 2500 Network Management System

### BUSINESS & TECHNICAL BENEFITS

- Intuitive management interface improves team efficiency
- Inherent security and reliability of the network infrastructure contributes to compliance with governmental healthcare legislative requirements
- Modular architecture allows for incremental growth versus large-scale replacement; providing investment protection and stability

### DEAL FACTS & FIGURES

- Date deal won: 2010
- Implementation date: 2010
- Business Partner: Melsernet

“Alcatel-Lucent delivers three compelling elements: the equipment performs exceptionally well, it's really easy to manage, and it is much, much more cost-effective than any other manufacturer.”

Dave Hunt, Manager of Operations and Service Support,  
Clark Memorial Hospital
