

Smart Tamat

Advance ●●●

**THE REFERENCE SOLUTION FOR
NOTIFICATION OF YOUR **CRITICAL EVENTS****

PRIORITY AND ISSUES

OF CRITICAL EVENT MANAGEMENT!

SECURITY

REACTIVITY

CENTRALIZATION

Whether you are a healthcare professional, an industrial site manager, a school director, or even a building security manager, your priority remains the same: to ensure and maintain the safety of your users under all circumstances.

This is why the responsiveness and centralization of your alarms are essential, according to the multiple risk situations that your establishments may face.

NOTIFY THE RIGHT PERSON, AT THE RIGHT TIME AND ON THE RIGHT MEDIA!

A SOLUTION TAILORED TO YOUR ORGANIZATION

The Smart TAMAT Advance is developed to perfectly integrate into various sectors and organizations, to enable them to ensure optimal responsiveness in a risk situation.

INDUSTRY

Whether you are in the manufacturing, pharmaceutical, food processing or chemical industry, our solution adapts to your business environment.

HEALTH

Clinic, hospital, nursing home, or any other care facility, our solution adapts perfectly to the various ecosystems and organizations in the health sector.

COMMUNITIES

Our solution adapts perfectly to the needs of communities and applies perfectly to schools and public administrations.

PUBLIC BUILDING

The Smart TAMAT Advance fully complies with the regulatory standards for establishments open to the public, whatever their activity.

SMART TAMAT ADVANCE

THE REFERENCE FOR NOTIFICATION SERVERS
OF CRITICAL EVENT!

*Reacting quickly to manage a crisis is essential.
With the Smart TAMAT Advance, it's possible!*

At **MWS**, we have developed the solution that ensures the notification of your critical events: the **Smart TAMAT Advance**.

As a multimedia connectivity platform, when a critical event occurs, the Smart TAMAT Advance optimizes information flow and its processing to easily trigger the alert thanks to the power of customizable and automated notification scenarios.

**SIMPLE
USE**

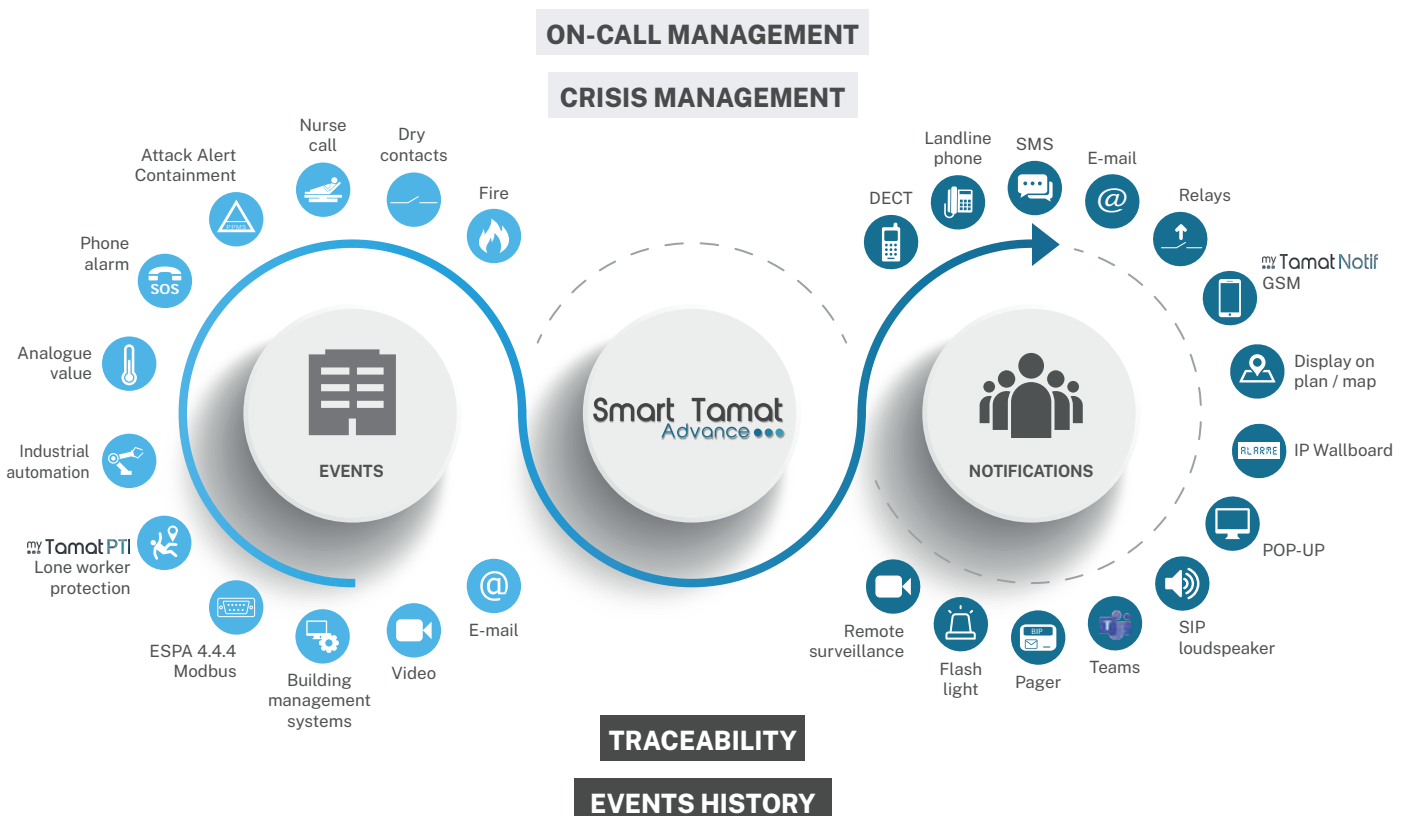

**CLEAR
INFORMATION**

**SYSTEMS
COMPATIBILITY**

PRINCIPLE

The **Smart TAMAT Advance** distributes, simultaneously and optimally, notifications to the right people at the right time through a rich library of connectors, designed to meet different business environments.

THE FEATURES

FOR UNIFY AND AUTOMATE YOUR ALERTS DISTRIBUTION

NOTIFICATION

Distribution of notifications across all types of media and in any format according to schedules and time slots. Practicality and accessibility: for each alarm, a dynamic message (text-to-speech) can be broadcast.

MOBILIZATION SCENARIO

For each alarm, a specific scenario is 100% customizable and applied. It allows sending a notification to a recipient or a mass notification by choosing different criteria such as priority, calendars, time slots, quorum, repetition...

ALARMS ACQUISITION

The Smart TAMAT Advance offers an alarm acquisition function suitable for single or multi-site via IP, supports multiple protocols and an escalation function for efficient alarm management.

LONE WORKER PROTECTION

Our solution allows you to easily supervise and locate your lone workers in the event of an alert. It identifies the person and her location (indoor and outdoor) and reports the event type and its trigger in order to facilitate care.

MANAGEMENT UNIT

Multi-tenant operation thanks to user profiles and management units, allowing to securely meet the different needs of a multi-service organization.

EVENTS HISTORY AND TRACEABILITY

The Smart TAMAT Advance tracks alarms in real time to allow you to consult (and export) configurable reports and statistics as well as the events history.

HIGH-AVAILABILITY

Your alarm server is operational in all circumstances thanks to server redundancy.

DYNAMIC DISPLAY OF LOCALIZATION

Geolocation on plan (indoor) and on map (outdoor) of your alarms, allowing to increase the responsiveness of the staff and assist them in their decision-making.

TELEPHONE CONNECTION

With its automatic pick up, it is ideal for alarm verification and allows optimize interventions.

CONFERENCE

Telephone conferencing to support your teams and ensure responsiveness in the processing of interventions (decision-making in emergencies).

VOICE RECORDING

Recording communications and conferences ensures better traceability and listening following an event.

A **web interface** for administration and use, designed for everyone!

Support service dedicated and **diagnostic tools** directly integrated into our solution.

Supervisable Platform

Backup automatic or manual

DEDICATED APPLICATIONS

my Tamat PTI

With **my Tamat PTI** application, your Smartphone becomes a Lone Worker Alarm Device, thus helping to maintain the safety of your mobile workers.

THE + OF THE SOLUTION

Centralized administration interface (web) on Smart TAMAT Advance and automatic update on the entire fleet of registered Smartphones. Availability of 6 detection modes:

my Tamat Notif

Turn your smartphone into a media that can receive alarms with our **my Tamat Notif** application. Its Smart TAMAT Advance coupling and the network coverage (3G/4G/5G or Wifi) allow you to receive notifications on the go.

THE + OF THE SOLUTION

Find all the Smart TAMAT Advance key features in an application: criticality, type, geolocation, tracking and status of the alert but also the management of the acknowledgment, the doubt removal function and event history.

DEDICATED TOOLS

TAMAT MAPS

With TAMAT Maps, view all types of alarms, fixed or moving, on maps and plans.

THE + OF THE SOLUTION

- Secure web architecture (thin client).
- Indoor location on plan via Dect/LWP terminals, Wifi (SSID), Beacon/BLE.
- Outdoor geolocation on map via GPS coordinates.

ON-CALL MANAGEMENT

Simply schedule one or more notification recipients from a calendar.

THE + OF THE SOLUTION

- Allows each department to independently manage its schedules and directories.
- The configuration is done directly on the scenarios to benefit from the Smart TAMAT Advance richness.
- Escalation management for alarm processing.
