### Integration Details:

Because managing your alarms is becoming a priority and the spreading the information is a source of security. The Smart TAMAT Advance alarm server will enable you to increase your productivity and reactivity. Indeed, based on several criteria, Smart TAMAT Advance will dispatch the information to the right persons.:

- **Smart TAMAT Advance** adapts to your working environment
- Control and optimize intervention processus
- Events traceability, Enable the staff to work in better conditions
- Allow a better protection of lone workers
- Multi-site management to better control your investment
- Reassurance by redundancy and high availability
- Increase efficiency with the automatic transfer of the information

**Smart TAMAT Advance** is the natural evolution of the Tamat V5 and Smart TAMAT, the reference in alarm server. The concept is to address productivity and reactivity issues by delivering the right message, to right person at the right time, based on the different criteria. **Smart TAMAT Advance** adapts to your environment:

- The **Smart TAMAT Advance** solution is based on 2 hardware platforms (Smart TAMAT Advance S and Smart TAMAT Advance L) and on a virtual environment (Virtual TAMAT Advance) to better meet the constraints of the market.
- Each platform has access to all licences
- Redundancy and high availability for all 3 platforms
- Personalized solution: Only buy what you need

Smart Tamat S  
Advance\*\*\*
