

# Equipping System Integrators with the only purpose-built switch offering for Operational Technology (OT) industries

Easy deployment, robust security, scalable performance and mission-critical support, unmatched in the industry

**Alcatel-Lucent OmniSwitch 6360 Stackable Gigabit Ethernet LAN Switch bundled with 1-year support (OT6360-P10-1YR, OT6360-PH24-1YR and OT6360-PH48-1YR)**

With the Alcatel-Lucent OmniSwitch® 6360 Stackable Gigabit Ethernet LAN Switch family bundled with 1-year Partner support, Alcatel-Lucent Enterprise accelerates digital transformation for system integrators with simplified deployments, seamless video surveillance integrations and AI-powered operations – all backed by robust cybersecurity, flexible management options and trusted reliability.

## Simple deployment and operations focused on the installer

- Benefit from easy deployment with minimal configuration and hassle-free setup. As easy as [1, 2, 3 with OmniSwitch® Lightning Config](#).
- Maintain efficient operations through AI-powered automation, orchestration and unified network management that provides visibility of the entire network, including connected IoTs
- Seamlessly integrate with video surveillance ecosystem players like [Milestone](#) and [Genetec](#)
- Develop APIs for third-party integrations with smart buildings players

## Powerful and scalable performance

- Leverage a specialized product portfolio designed for Operational networks – a powerful, user-friendly solution tailored to meet the unique needs of integrators from small to the very large and mission-critical networks
- Benefit from a simple yet powerful portfolio with a single operating system from edge to core, enabling secure and easy onboarding of Operational Technology and IoT devices for seamless deployment, management and monitoring, maximizing ease of use and enhancing opportunities for lucrative managed services

## Secure by design (bridging physical security and cybersecurity)

- Rely on products that are secure by design for the most demanding secure industries, featuring no-charge network access control (NAC), encryption, secure diversified code and macro- and micro-segmentation protocols
- Ensure security and compliance with robust cybersecurity measures that go beyond industry standards
- Boost the physical security of people, assets and infrastructure with a video surveillance solution that is fully integrated with major video management systems (VMS)
- Deploy a solution that is already certified to Trade Agreements Act (TAA), National Defense Authorization Act (NDAA), National Institute of Standards and Technology (NIST), Joint Interoperability Test Command (JITC) and Certified in Cybersecurity (CC) requirements

## Pre- and post-install services direct from integration support professionals

- Skip the generic help desk, SLA-driven support directly with a team focused on the integrator with proven expertise in mission-critical networks
- Go beyond the standard Limited Lifetime Warranty with embedded 1-year and 5-year support options, ensuring continuous expert assistance for Operational Technology environments
- Optional tailored support (SLAs, term and services) for the most critical accounts

ALE is more than just a network vendor; we are a trusted technology partner, deeply committed to meeting the unique needs of integrators in Operational Technology.
