The Alcatel-Lucent OmniSwitch 6465 is a family of ruggedized, fully manageable and fan-less Gigabit Ethernet switches. Designed for Industrial Ethernet applications, these hardened ethernet family offers a range of DIN rail and 19” rack mountable switches that are ideal for a wide variety of Industrial applications such as Intelligent Transportation, Railway, smart cities and Utilities.

OS6465 switches are a family of hardened, compact, fan-less gigabit Ethernet switches that have been designed specifically for industrial applications. The switches run on the widely deployed and field-proven Alcatel-Lucent Operating system that offers high security, reliability, performance and easy management. These switches are designed to operate in extended temperatures, offer higher EMI/EMC tolerance, a flexible range in power inputs options and high surge protection.

The OS6465 series offers HPoE (60W PoE) providing power to a range of new age devices from PTZ IP cameras on toll booths, LED lights and building management gateways in smart buildings to industrial control systems. These switches are easy to deploy and offer out-of-the-box plug-and-play, Zero-touch provisioning, network automation and disaster recovery options. These switches support IEEE 1588v2 PTP for the nanosecond-level precision timing requirements of industrial devices and applications. With support for MACSec on all ports, OS6465 enables end-to-end encrypted networks. The OS6465 family offers advanced system and network level resiliency features and convergence through standardized protocols in a space efficient form factor.

These versatile industrial switches are ideal for deployment in transportation and traffic control systems, utilities, IP surveillance systems and outdoor installations, to name a few.
**Alcatel-Lucent OmniSwitch 6465 models**

The OmniSwitch 6465 family offers customers an extensive selection of Gigabit fixed-configuration switches with up to 60 watts of PoE per port and power supply options that accommodate the most demanding requirements. The models can be mounted on DIN rail, 19” rack or a wall/panel.

All the models of OS6465 family support 60W PoE, IEEE1588v2 PTP (peer-to-peer & end-to-end transparent clock), MACSec and Alarm relays. All ports of OS6465-P6 and OS6465-P12 are capable of IEEE 1588v2 and MACSec. All ports of OS6465-P28 are capable of IEEE 1588v2 & MACSec (except ports 27, 28). OS6465 switches offer a surge protection of 6KV on all copper ports. OmniSwitch 6465 switches can form a Virtual Chassis between any models creating a single chassis-like entity using 1G SFP ports. OS6465-P28 switches can form a virtual chassis using 10G SFP+ ports. Up to 4 switches can be connected in a Virtual Chassis configuration with option to scale up to 8 in future.

Datasheet

Alcatel-Lucent OmniSwitch 6465
Switch power input specifications
OmniSwitch 6465-P6 and OS6465-P12 models support dual redundant, 1x3 terminal block inputs for power supplies in the front with three wire input cables: +VDC, -VDC and ground.

<table>

</table>

These switches can be powered with a Power Supply whose output meets the specifications above. When both input ports (PS1) and (PS2) are used, both inputs shall be powered by identical UL evaluated power supplies only.

OS6465 power supplies
OmniSwitch 6465-P6 and OS6465-P12 models support 180 W and 75 W AC power supplies. In addition, P6 and P12 switches have been functionally tested with third party DC power supplies for interoperability. In a redundant configuration, power supplies can be installed in any manner AC+AC, AC+DC or DC+DC.

### Product specifications and measurements

**Per-port LEDs**
- Non-PoE ports - green: link/activity
- PoE ports - amber: link/activity

**System LEDs**
- OK: green/amber operational status of the switch
- VC: green/amber master or slave role in VC configuration. Number of blinks identify stacking unit number
- PS1: Green/Amber - status for the primary power supply
- PS2: Green/Amber - status for the backup power supply
- ALRM IN: Amber when alarm in
- ALRM OUT: Amber when alarm out

**Scalability numbers and speeds**
- Wire rate at layer 2 and layer 3 on all ports
- Jumbo frame size: 9216 bytes (for 1 Gb/s)
- Total number of MAC addresses: 16 K
- Total number of IPv4 routes: 128
- Number of VLANs: 4,000

**Virtual chassis**
- Maximum number of units in a VC: 4
- Remote VC connection: using iSFP-GIG-SX, iSFP-GIG-LX

### Compliance and certifications

**Commercial safety**
- UL 60950-1, 2nd Ed.
- IEC 60950-1; all national deviations
- EN 60950-1; all deviations
- CAN/CSA-C22.2 No. 60950-1-03
- NOM-019 SCFI, Mexico
- AS/NZ TS-001 and 60950:2000, Australia
- UL-AR, Argentina
- UL-GS Mark, Germany

- Intelligent transportation (road)
  - NEMA TS-2
- Marine certifications
  - DNVGL-CG-0339†
  - IEC 60945:2002†
† Requires mandatory DNV kit for compliance
- Human-readable ASCII-based configuration files for off-line editing, bulk configuration and out-of-the-box auto-provisioning
- Non-volatile memory for start-up configuration
- Multiple microcode image support with fallback recovery
- Dynamic Host Configuration Protocol (DHCP) relay for IPv4/IPv6
- IEEE 802.1AB Link Layer Discover Protocol (LLDP) with Media Endpoint Discover (MED) extensions
- Network Time Protocol (NTP)
- DHCPv4 and DHCPv6 server managed by Nokia VitalQIP® DNS/DHCP IP Address Management
- Access to the AOS console via USB Adapter with Bluetooth technology provides wireless management access, eliminating the need of console cables

Cloud ready with OmniVista® Cirrus
- OmniVista® Cirrus offers a secure, resilient and scalable cloud-based network management. It offers hassle free network deployment and easy service roll-out with advanced analytics for smarter decision making. It provides IT friendly Unified Access with secure authentication and policy enforcement for users and devices.

Detailed product features

Simplified manageability and configuration
- Intuitive CLI in a scriptable Python & BASH environment via console. Telnet or Secure Shell (SSH) v2 over IPv4/IPv6
- Powerful WebView Graphical Web Interface via HTTP and HTTPS over IPv4/IPv6
- Network Automation and Programmability Abstraction Layer with Multivendor (NAPALM) support
- Fully programmable RESTful web services interface with XML and JSON support. API enables access to CLI and individual mib objects
- Integrated with Alcatel-Lucent OmniVista® products for network management
- Integrated with Nokia Network Services Platform (NSP)© for network management
- Full configuration and reporting using SNMPv1/2/3 to facilitate third-party network management over IPv4/IPv6
- File upload using USB, TFTP, FTP, SFTP or SCP using IPv4/IPv6

Monitoring and troubleshooting
- Local (on the flash) and remote server logging (Syslog): event and command logging
- IP tools: ping and trace route
- Dying Gasp support via SNMP and syslog messages
- Loopback IP address support for management per service
- Policy- and port-based mirroring
- Remote port mirroring
- sFlow v5 and Remote Monitoring (RMON)
- Unidirectional Link Detection (UDLD), Digital Diagnostic Monitoring (DDM)

Resiliency and high availability
- Unified management, control and virtual chassis technology
- Virtual Chassis 1+N redundant supervisor manager
- Smart continuous switching technology
• ITU-T G.8032/Y.1344 2010: Ethernet Ring Protection
• IEEE 802.1s Multiple Spanning Tree Protocol (MSTP) encompasses IEEE 802.1D Spanning Tree Protocol (STP) and IEEE 802.1w Rapid Spanning Tree Protocol (RSTP)
• Per-VLAN spanning tree (PVST+), and 1x1 STP mode
• IEEE 802.3ad/802.1AX Link Aggregation Control Protocol (LACP) and static LAG groups across modules
• Dual-home link support for sub-second link protection without STP
• Virtual Router Redundancy Protocol (VRRP) with tracking capabilities
• IEEE protocol auto-discovery
• Redundant and hot-swappable power supplies
• Built-in CPU protection against malicious attacks
• Split Virtual Chassis protection: Auto-detection and recovery of Virtual Chassis splitting due to one or more VFL or stack element failures*

Advanced security

Switch software security
• AOS secured diversified code solution is available on OmniSwitch® 6465, hardening it at both the software source code and binary executable levels to enhance overall network security.
• AOS secured diversified code protects networks from intrinsic vulnerabilities, code exploits, embedded malware, and potential back doors that could compromise mission critical operations.
• AOS secured diversified code is a proactive, defense approach toward network security that continuously defines and implements value-add capabilities to address both current and future threats.

Access control
• Alcatel-Lucent Access Guardian framework for comprehensive user-policy-based NAC
• Autosensing IEEE 802.1X multi-client, multi-VLAN support
• MAC-based authentication for non-IEEE 802.1X hosts
• Web based authentication (captive portal): a customizable web portal residing on the switch

• User Network Profile (UNP) simplifies NAC by dynamically providing pre-defined policy configuration to authenticated clients – VLAN, ACL, BW
• Secure Shell (SSH) with public key infrastructure (PKI) support
• Terminal Access Controller Access-Control System Plus (TACACS+) client
• Centralized Remote Access Dial-In User Service (RADIUS) and Lightweight Directory Access Protocol (LDAP) administrator authentication
• Centralized RADIUS for device authentication and network access control authorization
• Learned Port Security (LPS) or MAC address lockdown
• Access Control Lists (ACLs); flow-based filtering in hardware (Layer 1 to Layer 4)
• DHCP Snooping, DHCP IP and Address Resolution Protocol (ARP) spoof protection
• ARP poisoning detection
• IP Source Filtering as a protective and effective mechanism against ARP attacks
• LLDP Security mechanism for rogue device detection and restriction

QoS
• Priority queues: Eight hardware-based queues per port for flexible QoS management
• Traffic prioritization: Flow-based QoS Flow-based traffic policing and bandwidth management
• 32-bit IPv4/128-bit IPv6 non-contiguous mask classification
• Egress traffic shaping
• DiffServ architecture
• Congestion avoidance: Support for end-to-end head-of-line (E2E-HOL) blocking prevention, IEEE 802.1Qbb Priority-based Flow Control (PFC) and IEEE 802.3x Flow Control (FC)
• Auto-QoS support for Generic Object Oriented Substation Events (GOOSE) messages

Layer-3 routing and multicast

IPv4 routing
• Static routing
• Routing Information Protocol (RIP) v1 and v2
• Virtual Router Redundancy Protocol (VRRPv2)
• DHCP relay (including generic UDP relay)

IPv6 routing
• Internet Control Message Protocol version 6 (ICMPv6)
• Static routing
• Virtual Router Redundancy Protocol version 3 (VRRPv3)
• Neighbor Discovery Protocol (NDP)*
• Policy-based routing and server load balancing
• DHCPv6 server

IPv4/IPv6 multicast
• Internet Group Management Protocol (IGMP) v1/v2/v3 snooping
• Multicast Listener Discovery (MLD) v1/v2 snooping

Advanced Layer-2 services
• Ethernet services support using IEEE 802.1ad Provider Bridges (also known as Q-in-Q or VLAN stacking)
• Ethernet OAM (802.1ag, ITU-T Y.1731): Connectivity Fault Management (L2 ping & Link trace)
• Ethernet in First mile: Link OAM (802.3ah)
• Ethernet network-to-network interface (NNI) and user network interface (UNI)
• Service Access Point (SAP) profile identification
• Service VLAN (SVLAN) and Customer VLAN (CVLAN) support
• VLAN translation and mapping including CVLAN to SVLAN
• Port mapping
• DHCP Option 82: Configurable relay agent information
• Multiple VLAN Registration Protocol (MVRP)
• HA-VLAN for Layer 2 clusters such as MS-NLB and active-active Firewall clusters*
• Customer Provider Edge (CPE) test head traffic generator and analyzer tool
• TR-101 Point-to-Point Protocol over Ethernet (PPPoE) Intermediate Agent allowing for the PPPoE network access method
• Service Assurance Agent (SAA) for proactively measuring network health, reliability and performance.
• Jumbo frame support

Datasheet
Alcatel-Lucent OmniSwitch 6465
• Bridge Protocol Data Unit (BPDU) blocking
• STP Root Guard

**Supported standards**

**IEEE standards**
• IEEE 802.1D STP
• IEEE 802.1p CoS
• IEEE 802.1Q VLANs
• IEEE 802.1ab (LLDP)
• IEEE 802.1ag (OA&M)
• IEEE 802.1ad Provider Bridges Q-in-Q/VLAN stacking
• IEEE 802.1ak (Multiple VLAN Registration Protocol (MVRP)
• IEEE 802.1s MSTP
• IEEE 802.3i 10BASE-T
• IEEE 802.1w RSTP
• IEEE 802.3x Flow Control
• IEEE 802.3ad/802.1AX Link Aggregation
• IEEE 802.3ae 10 GigE
• IEEE 802.3af Power over Ethernet
• IEEE 802.3at PoE Plus
• IEEE 1588v2 Precision Time Protocol

**ITU-T recommendations**
• ITU-T G.8032/Y.1344 2010: Ethernet Ring Protection (ERPv2)
• ITU-T Y.1731 OA&M fault and performance management

**IETF RFCs**

**IPv4**
- RFC 2131 Dynamic Host Configuration Protocol (DHCPv4)
- RFC 4022/2452 MIB for IPv4 TCP

Please replace the “-xx” in the part number with the country-specific power cord (e.g. OS6465-12-US will come with a power cord for the USA, -UK for United Kingdom). ALE offers 11 different power cord options. Please consult the price list for the power cord options offered.

**Warranty**
The OmniSwitch 6465 family comes with a Limited Lifetime Hardware Warranty.
