OpenTouch Conversation Application Provisioning

This document describes the services offered by OpenTouch Conversation application for Android smartphone.

The following guidelines are intended to help you get the most out of your device:

- Local contacts should be enriched with useful details: photo, job title, company, phone numbers, email, IM, address, etc. (For example, a photo & caller identification will be used in the Wall).
- Keep your local contacts synchronized across all your devices. For example, you can use Exchange Active Sync or Google Contacts. The idea is to add a new contact on one device only and it is automatically synchronized on the other devices via sync over the air (all OpenTouch clients – Android smartphone & tablet, iPhone & iPad will benefit from this sync).
- When you can, use a Bluetooth handset so that you can take full advantage of your display whatever the situation.
- Use Corporate WLAN or Wi-Fi when available for less network latency.
- Remember: always drive safely, avoid distractions and follow local laws!

OpenTouch Conversation for Android smartphone is an application that is common to OmniPCX Office Rich Communication Edition (OXO RCE), OpenTouch Business Edition (OTBE) and OpenTouch Multimedia Services (OTMS) infrastructures. Your system administrator will customize the application depending on the host infrastructure. Please consult the corresponding user manual by selecting the corresponding chapter for your system. If you need to check which system you are connected to, please open the 'About' section in the application:

I.1 Start OpenTouch™ Conversation

I.1.1 Start the application

Select the OpenTouch Conversation Icon.

Tip: create an OpenTouch Conversation shortcut on your homepage.

I.1.2 Sign in

When you connect for the first time, if you have not configured the connection parameters, a connection screen is displayed requiring the OmniPCX Office RCE subscriber credentials.

1. Set your connection parameters.
2. Enter your user name (login) - phone's internal number. Enter your password. The password is the same as the voicemail.
3. Sign in.
4. In the initial login screen you can see the 'Scan QR Code' button (when necessary, hide the input keyboard). When you press this button, the application scans the QR Code image sent by your system administrator. The application then automatically configures the connection parameters (the number of parameters provided depends on your security policy).

I.1.3 Voice-over-IP mode

OpenTouch Conversation integrates voice over IP (VoIP) capability allowing the user to place and receive business calls on the mobile through the wireless LAN (WLAN). Unless you do not wish to use VoIP (deactivated via a dedicated setting), VoIP capability will be provided automatically as soon as the mobile has corporate WLAN coverage and has successfully registered to the SIP server.

A VoIP icon on your mobile shows the VoIP status:

- : VoIP capability is activated (application is registered to the SIP server).
- : VoIP capability is deactivated via a dedicated setting.
- No icon displayed: cellular mode only or loss of SIP connection (VoIP capability is temporarily unavailable).

OpenTouch Conversation supports Voice over IP only through a corporate wireless LAN.
I.1.4 **VoIP Softphone**
Without SIM card, OpenTouch Conversation operates as a VoIP softphone (according to system configuration). In this case, the voice over IP (VoIP) is always enabled. All incoming calls are presented in the OpenTouch Conversation screen. All features dedicated to the cellular mode are deactivated (private call, SMS, business mobile phone number).

I.1.5 **Using a Bluetooth audio device connected to your phone**
For cellular calls, use your Bluetooth® headset as you usually do. For VoIP calls, we recommend to control the OpenTouch Conversation application directly from your smartphone.

I.1.6 **Sign out**
- Open your OpenTouch profile (sliding menu).
- Sign out.
I.2  Settings

I.2.1  My profile

- Open your OpenTouch profile (sliding menu).
- Change your call routing profile.
- Display your user information.
- Access to settings.
- Software version (About).
- Sign out.

I.2.2  Activate / deactivate VoIP feature

1. Open your OpenTouch profile (sliding menu).
3. Open connections settings.
4. Activate / deactivate VoIP feature (Media option).
5. A specific icon is displayed on your home page if the feature is activated.

By default, the VoIP setting is activated.
I.2.3  Change your photo / avatar

1. Open your OpenTouch profile (sliding menu).
2. Display your user information.
3. Tap on your current photo/avatar to change it.
4. Select your new picture.

I.2.4  Settings

Settings depend on your system. Some options are not displayed if not available on your system.

1. Open your OpenTouch profile (sliding menu).
3. Open settings.

<table>
<thead>

I.3 Homepage

I.3.1 Homepage description
1. My profile: settings and information about the user.
2. Display of all conversation logs.
   - Display of missed conversations (filter).
3. Tab.
   - Access features by selecting the dedicated tab:
     - Conversation wall. The number of new events is displayed.
     - Contacts and favorites.
     - Dialer.
     - Voicemail access. You have unread voice messages (the number of unread messages is displayed).
     - Display of instant messages (filter). The number of unread messages is displayed.

I.3.2 Conversation wall (History)
Conversation Wall contains the history of all your conversations.

The Wall is divided into 2 parts:
5. Past conversations.
   - All conversations are sorted by date: today, yesterday, this week, last week and before.

How to understand the conversation wall:
Each item represents a conversation log by user, by time slot and by the corresponding number of unread events.
- Red badge: missed or new events.
- Purple badge: ongoing conversation.
- Grey badge: past event.
- Conversation.
- Voice messages.
- Instant messages.
- : This icon indicates a contact from the local directory of the mobile.
- : This icon indicates a favorite contact.
The action on a contact depends on how you select it.

1. Select the badge to direct call the displayed number.
2. If you select an unread event, you open the history card directly.
3. If you select a read event, you put your contact on the stage.
4. To display only new missed calls, select the appropriate filter.
5. Select the current conversation in the homepage to go back to the conversation screen.

### I.3.3 To delete one conversation log

You can delete a conversation log if it is acknowledged.

1. Long press on the item.
2. Delete the conversation log.

### I.3.4 To acknowledge a missed call

If an item is marked as a missed event, you can acknowledge the event. A conversation log is acknowledged if all events for that item are acknowledged.

1. Long press on the item.
2. Acknowledge the event.

A single event is automatically acknowledged when consulting.

### I.3.5 To delete all conversations in the wall

1. Press the Android menu button.
2. Delete all conversations.
3. Confirm the deletion.
I.3.6 **Status icons**

Application is connected and fully available.
Consult the notification bar to identify the issue.

Call in progress.
Missed calls.
new voice message(s).
New instant message(s).
Voice over IP activated.
Voice over IP deactivated.
Consult the notification bar to identify the issue.
Selected routing profile with the mobile has no ringing on incoming calls.

I.3.7 **Call Routing**

I.3.7.1 **Select your routing profile**

1. Open your OpenTouch profile (sliding menu).
2. Open the routing profile management.
3. Select a profile... Details of the selected profile are displayed just below.
4. You can customize a selected profile.
   Select which devices will ring when you receive an incoming call.
5. Apply.

The active routing profile is displayed in the user banner.

The displayed routing profiles depend on your configuration and installation. For example, Office profile is displayed if you have a multi set configuration. At first launch of the application, a Popup will ask you for nomadic destination number. The call routing details depend on the selected profile. No mobility: in this mode, all incoming calls are routed to your desk phone. However you can choose to forward the call to another number or voicemail. Mobility (mobile): in this mode, all incoming calls are routed to your mobile device.
I.3.8 **Change routing profile via QR code or NFC tag**
You can modify your current ringing call routing profile with any internal deskphone which is prepared with QR code or NFC tag. You can find a QR code or NFC tag in a meeting room for example.

You are facing the QR code or the NFC tag of the internal deskphone. Define the new internal number by using one of the following:

- Tap the NFC tag with your smartphone. The smartphone vibrates if the NFC tag is accepted. The new routing profile (mobility) is displayed.
- Open your OpenTouch profile (sliding menu).
  - Open the routing profile management.
  - Scan QR Code.

Your incoming calls will ring on this new deskphone. To go back to the initial routing state, tap again the NFC or scan again the QR code.

I.3.9 **Define numbers**

- Select or define a phone number to use for mobility mode.
- Select or define a number to forward your calls on to.
  1. Select the number to modify.
  2. Select the number in the list of pre-defined numbers, edit the list to modify an existing number or create a new number (maximum of 4 numbers including mobility number).
  3. Enter the number and its label.
  4. Apply.
I.3.10 **Contact card**
A contact card represents a person.
Open a contact card by selecting a contact in the conversation Wall or in your favorites.

A card contains 3 pages.

- Page 1 is the conversation history with this contact.
- Page 2 is the contact on the stage. The default number used to make a call is the business number (action in gray is not available).
  - Make a call with the default business number
  - Send instant message
  - Send SMS
  - Send e-mail
  - Make a call with the mobile number
- Page 3 is the contact details.
- Swipe right and left to navigate between the 3 pages.

**From the conversation history page:** you can acknowledge or delete an event or call the contact.

1. Press on the item.
2. Delete the conversation log.
   - Acknowledge the event.
I.3.11 **Favorites**

Favorites give you faster access to your preferred contacts.

1. ✨ Open your contact tab.
   Your favorite contacts are displayed.
   Favorites give you faster access to your preferred contacts.
2. Open a contact card.
3. ☑️ Press the call icon to call your contact.
4. Search for a contact in your local contacts or in a corporate look-up by using the search interface.

![Contacts Screen](image)

- : This icon indicates a contact from your local directory.
- ★: This icon indicates a favorite contact.

I.3.12 **Search a contact**

1. ✨ Open your contact tab.
2. Enter the name of your contact.
3. From the search result, select the contact you are searching for.
4. ☑️ Call your contact.

If the contact is not in your local directory, you can save them as a new local contact.

- Open the contact card.
- Press the Android menu button.
- Add the contact to your local directory.

![Contacts Screen](image)

You can search on your contact's last name or last name/first name:

- "Last name": The search runs only on contacts' last names.
- "Last name#first name": The search runs on contacts' last names and first names.

The search runs as soon as you enter more than 2 characters (predictive search) or when you validate the search.
I.3.13 **Add or remove the selected contact to your list of Favorites**

Open the contact card of the caller you want to add or remove to your favorites.

- Add the contact to your favorites list.
- Remove the contact from your favorites list.

---

I.3.14 **Visual Voice Mail**

1. You have unread voice messages (the number of unread messages is displayed). Open your visual voicemail.
2. Select the message to listen to.
3. From the selected message you can:
   - Move the cursor along the play bar to go forward or backward in the message.
   - Pause or resume the message.
   - Activate/deactivate loudspeaker.
   - Delete the message.
4. Customize your voice mail.
5. Press the Android menu button:
   - Delete all read messages.
   - Calling voice mail.
I.4 Conversation

Actions available depend on the type of conversation and system. If an action is not available, the icon is grayed.

I.4.1 Set up a conversation with a contact

- You can make a call from the conversation wall, visual voicemail tab or instant messaging tab.
- You can make a call from a search on your local contacts or from a corporate look-up.
- You can make a call from the contact card (details or history).

How to set up a conversation with a contact:
1. Call directly using the displayed phone number.
2. Set up different types of conversation (if available).
3. Call using a specific phone number from the contact card.

I.4.2 Make a conversation by entering a number

1. Open the keypad.
2. Enter your caller’s number.
3. Make the call.

Copy/paste is available from the keypad. You can add the number you entered to the local directory of your mobile (new or existing contact).
I.4.3 Receiving a conversation
Incoming call screen of the OpenTouch conversation is displayed only if the corresponding setting is active. Otherwise, the default Android screen is used.

<table>
<thead>
<tr>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Answer the call.</td>
</tr>
<tr>
<td>Forward an incoming call to voice mail.</td>
</tr>
<tr>
<td>Decline the call with an instant message.</td>
</tr>
<tr>
<td>Transfer the call to another device or number. Select the destination of the transfer: one of your office devices or a pre-defined number or enter another number.</td>
</tr>
</tbody>
</table>

If you receive a call while your phone is locked, a pop-up is displayed on the page. Slide to take the call and follow the instructions described in this section.

I.5 During conversation

I.5.1 Screen description
Actions available during a conversation depend on the type of conversation. If an action is not available, the icon is grayed.

You are in conversation with one contact. You are in a call with more than one caller (hold or conference).
### I.5.2 Make a second call / Switching between two calls / Transfer call to your contact on hold / Three-party conference / Send DTMF

<table>
<thead>
<tr>
<th>Action</th>
<th>Icon</th>
</tr>
</thead>
<tbody>
<tr>
<td>End the active call.</td>
<td></td>
</tr>
<tr>
<td>End the conference and retrieve the first caller. The second is on hold.</td>
<td></td>
</tr>
<tr>
<td>Make a second call.</td>
<td></td>
</tr>
<tr>
<td>Put the distant on hold.</td>
<td></td>
</tr>
<tr>
<td>Recover the call on hold.</td>
<td></td>
</tr>
<tr>
<td>Divert the incoming voice call to a predefined number.</td>
<td></td>
</tr>
<tr>
<td>Mute/un-mute the conversation.</td>
<td></td>
</tr>
<tr>
<td>Loudspeaker.</td>
<td></td>
</tr>
<tr>
<td>Display active or on-hold calls by swiping right or left.</td>
<td></td>
</tr>
<tr>
<td>Switching between two calls.</td>
<td></td>
</tr>
<tr>
<td>Transfer call to your contact on hold.</td>
<td></td>
</tr>
<tr>
<td>Setting up a conference.</td>
<td></td>
</tr>
<tr>
<td>End the conference and retrieve your previous caller. The other callers are put on hold.</td>
<td></td>
</tr>
<tr>
<td>Start an instant message with the contact.</td>
<td></td>
</tr>
<tr>
<td>During the conversation, you can check information by consulting the Conversation Wall. Select the current conversation in the Conversation Wall to go back to the conversation screen.</td>
<td></td>
</tr>
<tr>
<td>Release all participants from the conversation.</td>
<td></td>
</tr>
<tr>
<td>Send DTMF.</td>
<td></td>
</tr>
</tbody>
</table>
I.5.3 **Audio media switch from your smartphone to any deskphone via QR code and NFC tag**

When you are in conversation, you can switch the active audio media from your smartphone to any internal deskphone prepared with QR code or NFC tag. You can find a QR code or NFC tag in a meeting room for example. You can use this feature to isolate you in a meeting room. When the conversation is ended, the routing profile automatically returns to its previous state.

- Tap directly the NFC tag of the targeted deskphone with your smartphone.
- Select the ‘Divert incoming call’ icon, then scan the QR code.

I.6 **Instant Messaging**

I.6.1 **Start an instant message**

An instant message is a type of conversation which offers real-time text transmission with your contact.

You start an instant message like other conversation from a contact card.

I.6.2 **Receive an instant message**

You receive instant messages in the instant messaging tab. The number of missed instant messages is displayed.

I.6.3 **Export an Instant Messaging**

You can export the text of a conversation, to copy it into an email for example.

1. Open the conversation to copy.
2. Press the Android menu button.
3. Export chat. The content is copied to the clipboard.
4. Paste the conversation into other application like email (long press in a text box).

II.1 Start OpenTouch™ Conversation

II.1.1 Start the application

Select the OpenTouch Conversation Icon.

Tip: create an OpenTouch Conversation shortcut on your homepage.

II.1.2 Sign in

When you connect for the first time, if you have not configured the connection parameters (OpenTouch settings), a login configuration window is displayed to enter the OpenTouch credentials and OpenTouch server address.

1. Set your connection parameters.
2. Enter your user name (login) / Password (OpenTouch user password).
3. Sign in.
4. In the initial login screen you can see the 'Scan QR Code' button (when necessary, hide the input keyboard). When you press this button, the application scans the QR Code image sent by your system administrator. The application then automatically configures the connection parameters (the number of parameters provided depends on your security policy).

II.1.3 Voice-over-IP mode

OpenTouch Conversation integrates voice over IP (VoIP) capability allowing the user to place and receive business calls on the mobile through Wifi or cellular data network. Unless you do not wish to use VoIP (deactivated via a dedicated setting), VoIP capability will be provided automatically as soon as the mobile has a data network coverage (Wifi or cellular) and has successfully registered to the SIP server.

A VoIP icon on your mobile shows the VoIP status:

- ✛: VoIP capability is activated (application is registered to the SIP server).
- ✓: VoIP capability is deactivated via a dedicated setting.
- ✝: No icon displayed: cellular mode only or loss of SIP connection (VoIP capability is temporarily unavailable).

OpenTouch Conversation supports Voice over IP outside corporate wireless LAN (including home, hotspot WiFi network).
II.1.4 **VoIP Softphone**
Without SIM card, OpenTouch Conversation operates as a VoIP softphone (according to system configuration). In this case, the voice over IP (VoIP) is always enabled. All incoming calls are presented in the OpenTouch Conversation screen. All features dedicated to the cellular mode are deactivated (private call, SMS, business mobile phone number).

II.1.5 **Using a Bluetooth audio device connected to your phone**
For cellular calls, use your Bluetooth® headset as you usually do. For VoIP calls, we recommend to control the OpenTouch Conversation application directly from your smartphone.

II.1.6 **Sign out**
- Open your OpenTouch profile (sliding menu).
- Sign out.
II.2 Settings

II.2.1 My profile

Open your OpenTouch profile (sliding menu).
Get your active call started on another device.
Change your call routing profile.
Change your presence status.
Display your user information.
Access to settings.
Software version (About).
Exit the application.
Get your active call started on another device.
Activate the Manager/Assistant mode (optional).
Activate / deactivate supervision feature (optional).
Sign out.

II.2.2 Activate / deactivate VoIP feature

1. Open your OpenTouch profile (sliding menu).
3. Open connections settings.
4. Activate / deactivate VoIP feature (Media option).
5. A specific icon is displayed on your home page if the feature is activated.

By default, the VoIP setting is activated.
II.2.3 Change user information
Define your private phone numbers, your photo or avatar.

1. Open your OpenTouch profile (sliding menu).
2. Display your user information.

II.2.3.1 Change your private phone numbers
3. Select the edition mode.
4. Define your phone numbers: business, colleague, home or personal mobile phone numbers. The business phone number is mandatory.
5. Save new phone numbers.

II.2.3.2 Change your photo / avatar
6. Tap on your current photo/avatar to change it.
7. Select your new picture.

II.2.3.3 Activate/deactivate the secret identity (CLIR)
8. Activate/deactivate the secret identity. Your external caller will not see your phone number. When the secret identity is activated, the secret avatar is displayed in the top banner of the wall as a reminder.
II.2.4 Manager/Assistant (optional)

System configuration provides a 'Manager / Assistant' feature so that an assistant can receive all the manager’s calls except white list calls. The white list is created by the manager from the deskphone and the corresponding calls are processed according to the active call routing profile.

1. Open your OpenTouch profile (sliding menu).
2. Open Manager / Assistant settings.
3. Activate (on) / deactivate (off) the delegation.
4. A specific icon is displayed on your home page if the feature is activated.

II.2.5 Supervision (optional)

Your business phone number can be supervised. This means that your incoming calls can be picked up by a supervisor when you are absent, busy or off-site.

1. Open your OpenTouch profile (sliding menu).
2. Activate / deactivate supervision feature.
3. A specific icon is displayed on your home page if the feature is activated.
4. If your phone is supervised, the call log displays the name of the supervisor who has picked up your call.
II.2.6 **Settings**

Settings depend on your system. Some options are not displayed if not available on your system.

1. Open your OpenTouch profile (sliding menu).
3. Open settings.

II.3 Homepage

II.3.1 Homepage description
1. My profile: settings and information about the user.
2. Display of all conversation logs.
   Display of missed conversations (filter).
3. Tab.
   Access features by selecting the dedicated tab:
   - Conversation wall.
     The number of new events is displayed.
   - Contacts and favorites.
   - Dialer.
   - Voicemail access.
     You have unread voice messages (the number of unread messages is displayed).
   - Meeting.

II.3.2 Conversation wall
Conversation Wall contains the history of all your conversations.

The Wall is divided into 3 parts:
4. Future meeting if managed by your system.
5. Conversation in progress.
6. Past conversations.
   All conversations are sorted by date: today, yesterday, this week, last week and before.

How to understand the conversation wall:
Each item represents a conversation log by user, by time slot and by the corresponding number of unread events.

- Red badge: missed or new events.
- Purple badge: ongoing conversation.
- Grey badge: past event.
- Black badge: future event (meeting).
- Conversation.
- Visual Voice Mail.
- Instant messages.
- Meeting.
- This icon indicates a contact from the local directory of the mobile.
- This icon indicates a favorite contact.

The colored bar under the avatar shows the contact's presence status.

The action on a contact depends on how you select it.
1. Select the badge to direct call the displayed number.
2. If you select an unread event, you open the history card directly.
3. If you select a read event, you put your contact on the stage.
4. To display only new missed calls, select the appropriate filter.
5. Select the current conversation in the homepage to go back to the conversation screen.

II.3.3 **To delete one conversation log**
You can delete a conversation log if it is acknowledged.
1. Long press on the item.
2. Delete the conversation log.

II.3.4 **To acknowledge a missed call**
A conversation log is acknowledged if all events for that item are acknowledged.

If an item is marked as a missed event, you can acknowledge the event.
1. Long press on the item.
2. Acknowledge the event.

A single event is automatically acknowledged when consulting.
II.3.5 To delete all conversations in the wall

1. Press the Android menu button.
2. Delete all conversations.
3. Confirm the deletion.

II.3.6 Status icons

Application is connected and fully available.
Consult the notification bar to identify the issue.

Call in progress.
Missed calls.
new voice message(s).
Next meeting(s).
Voice over IP activated.
Voice over IP deactivated.
Consult the notification bar to identify the issue.

Selected routing profile with the mobile has no ringing on incoming calls.

II.3.7 Call Routing

II.3.7.1 Select your routing profile

1. Open your OpenTouch profile (sliding menu).
2. Open the routing profile management.
3. Select a profile... Details of the selected profile are displayed just below.
4. You can customize a selected profile. Select which devices will ring when you receive an incoming call.
5. Apply.

The active routing profile is displayed in the user banner.

If you selected a routing profile with mobile not ringing, a specific status icon is displayed.

The displayed routing profiles depend on your configuration and installation.
II.3.8  Create a new profile

1. Edit the new routing profile.
2. Enter name of the new profile.
3. Select which device will be used to make your calls.
4. Select which devices will ring when you receive an incoming call.
5. Create the new profile. The new profile is displayed on the list of routing profiles.

If you create a routing profile where you define to dial from an other device than your mobile, a warning is displayed.

II.3.9  Define numbers

Select or define a number to forward your calls on to.

1. Select the edition mode.
2. Enter a phone number then apply.
3. Check that the corresponding profile is selected.
4. Apply.

II.3.10 Define user

Select or define a user to forward your calls on to.

1. Select the edition mode.
2. Select a user in the search result.
3. Check that the corresponding profile is selected.
4. Apply.
II.3.11 Change routing profile via QR code or NFC tag
You can modify your current ringing call routing profile with any internal deskphone which is prepared with QRcode or NFC tag. You can find a QR code or NFC tag in a meeting room for example. One hour after the routing change, the application will prompt the user to keep this configuration or get back to the initial routing state.

You are facing the QR code or the NFC tag of the internal deskphone.

1. Open your OpenTouch profile (sliding menu).
2. Open the routing profile management.
3. Define the new internal number by using one of the following:
   - Scan QR Code.
   - Tap the NFC tag with your smartphone.
4. Apply.
   Your incoming calls will ring on this new deskphone.

II.3.12 Delete a profile

1. Select the profile to delete.
2. Delete the profile.

The profile My office devices cannot be deleted (default profile).
II.3.13 Presence

The colored bar under the avatar shows the contact's presence status.

Available | Busy | Be right back | Appear Offline

The OpenTouch Conversation presence status of your contact can be augmented with the Outlook calendar presence (Exchange – depending on the system). The calendar presence of your favorite contact is displayed in the contact card when she/he is in an Exchange meeting with status Free, Working Elsewhere or Tentative so that I know if I can call her/him.

Change your presence status.

1. Open your OpenTouch profile (sliding menu).
2. Access to the presence feature.
3. Change your presence status.
4. Apply.
II.3.14 Contact card

A contact card represents a person. Open a contact card by selecting a contact in the conversation Wall or in your favorites.

A card contains 3 pages:

- Page 1 is the conversation history with this contact.
- Page 2 is the contact on the stage. The default number used to make a call is the business number (action in gray is not available). The color bar under the photo shows your contact's presence status (Available, Be right back, Busy, Appear Offline). The Microsoft Outlook calendar presence (Exchange) of a favorite contact, when available, is displayed in this page (depending on the configuration of the system and the settings of your contact account).
  - Make a call with the default business number
  - Send instant message
  - Send SMS
  - Send e-mail
  - Make a call with the mobile number
- Page 3 is the contact details.
- Swipe right and left to navigate between the 3 pages.

From the conversation history page: you can acknowledge or delete an event or call the contact.

1. Press on the item.
2. Delete the conversation log.
   - Acknowledge the event.
II.3.15 **Favorites**

Favorites give you faster access to your preferred contacts.

1. 🗓️ Open your contact tab.
   Your favorite contacts are displayed.
   Favorites give you faster access to your preferred contacts.
2. 📋 Open a contact card.
3. ✨ Press the call icon to call your contact.
4. 🔍 Search for a contact in your local contacts or in a corporate look-up by using the search interface.

.quest: This icon indicates a contact from your local directory.
🌟: This icon indicates a favorite contact.

If you have other OpenTouch Conversation clients, the same list of favorites is displayed for each client.

II.3.16 **Search a contact**

1. 🗓️ Open your contact tab.
2. 📡 Enter the name of your contact.
3. 📦 From the search result, select the contact you are searching for.
4. ☎️ Call your contact.

If the contact is not in your local directory, you can save them as a new local contact.
- 📡 Open the contact card.
- ✨ Press the Android menu button.
- 📡 Add the contact to your local directory.

The search runs immediately on local contacts (predictive search). You can base your search on 2 strings for better results.
To perform a corporate look-up, select the specific search button.
II.3.17 **Add or remove the selected contact to your list of Favorites**

Open the contact card of the caller you want to add or remove to your favorites.

- Add the contact to your favorites list.
- Remove the contact from your favorites list.

II.3.18 **Visual Voice Mail**

1. You have unread voice messages (the number of unread messages is displayed).
2. Open your visual voicemail.
3. Select the message to listen to.
4. From the selected message you can:
   - Move the cursor along the play bar to go forward or backward in the message.
   - Pause or resume the message.
   - Activate/deactivate loudspeaker.
   - Delete the message.
4. Customize your voice mail.
5. Press the Android menu button:
   - Delete all read messages.
   - Calling voice mail.
II.4 Conversation

Actions available depend on the type of conversation and system. If an action is not available, the icon is grayed.

II.4.1 Set up a conversation with a contact
- You can make a call from the conversation wall, visual voicemail tab, instant messaging tab or a scheduled meeting, if available on your system.
- You can make a call from a search on your local contacts or from a corporate look-up.
- You can make a call from the contact card (details or history).

How to set up a conversation with a contact:
1. Call directly using the displayed phone number.
2. Set up different types of conversation (if available).
3. Call using a specific phone number from the contact card.

II.4.2 Make a conversation by entering a number
1. Open the keypad.
2. Enter your caller's number.
3. Make the call.

Copy/paste is available from the keypad. You can add the number you entered to the local directory of your mobile (new or existing contact).
II.4.3 Make a private call

By default, you make business call with the OpenTouch Conversation. But you can make private call. In this case, you call your contact without going through your company telephone system.

Use one of the following:

- If you enable the private call option in the OpenTouch Conversation configuration, when you make a call by dialing the number from the native dialer of your mobile phone, a popup lets you choose to make a business or a private call.
- Long press on the phone number allows you to make a private call.

II.4.4 Dial from another device (one-shot)

This feature provides the capability to launch a single call from selected device. When the conversation is ended, the routing profile automatically returns to its previous state. This is particularly useful in case of very bad cellular network coverage (both audio and data unavailable) or use of a meeting room deskphone for more call comfort.

- Long press on the phone number to call
- Dial from
- Select the device in the list or define another number.

The device list for selection depends on the endpoints registered by the system administrator.

If you enable the private call option in the OpenTouch Conversation configuration, this feature is available with the native dialer.
II.4.5 Receiving a conversation
Incoming call screen of the OpenTouch conversation is displayed only if the corresponding setting is active. Otherwise, the default Android screen is used.

<table>
<thead>
<tr>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Answer the call.</td>
</tr>
<tr>
<td>Forward an incoming call to voice mail.</td>
</tr>
<tr>
<td>Decline the call with an instant message.</td>
</tr>
<tr>
<td>Transfer the call to another device or number. Select the destination of the transfer: one of your office devices or a pre-defined number or enter another number.</td>
</tr>
</tbody>
</table>

If you receive a call while your phone is locked, a pop-up is displayed on the page. Slide to take the call and follow the instructions described in this section.

II.4.6 Audio media switch from your deskphone to your smartphone via NFC
During an active call, capability to switch the audio media from your deskphone to your smartphone via a NFC sticker located inside/on your deskphone.

II.4.7 Get your active call started on another device
You set up a call from another device. You need to get this call on your mobile.

1. Open your OpenTouch profile (sliding menu).
2. Get active call.
II.5 During conversation

II.5.1 Screen description
Actions available during a conversation depend on the type of conversation. If an action is not available, the icon is grayed.

You are in conversation with one contact.

You are in a call with more than one caller (hold or conference).

II.5.2 Make a second call / Switching between two calls / Transfer call to your contact on hold / Three-party conference / Send DTMF

<table>
<thead>
<tr>

</tr>
<tr>
<td>conversation.</td>
<td>☑️</td>
</tr>
</tbody>
</table>
conversation screen.

Release all participants from the conversation.

Send DTMF.

Manual handover VoIP to cellular.
If you are in conversation with one caller, you can switch your conversation from Voice over IP mode to Cellular mode.

II.5.3 Receiving a second call (according system configuration)
During a conversation, another person is trying to call you. Name or no. of the caller displayed for 3 seconds.

You are alerted by a notify ringtone (native notify ringtone defined in Android settings).

Answer the call. The first call is on hold.

Forward an incoming call to voice mail.

Decline the call with an instant message.

Transfer the call to another device or number.
Select the destination of the transfer: one of your office devices or a pre-defined number or enter another number.

II.5.4 Audio media switch from your smartphone to any deskphone via QR code and NFC tag
When you are in conversation, you can switch the active audio media from your smartphone to any internal deskphone prepared with QRcode or NFC tag. You can find a QR code or NFC tag in a meeting room for example. You can use this feature to isolate you in a meeting room. When the conversation is ended, the routing profile automatically returns to its previous state.

- Tap directly the NFC tag of the targeted deskphone with your smartphone.
- Select the ‘Divert incoming call’ icon, then scan the QR code.
II.6 Instant Messaging

II.6.1 Start an instant message
An instant message is a type of conversation which offers real-time text transmission with your contact.

You start an instant message like other conversation from a contact card.

II.6.2 Receive an instant message
If you are online, you receive instant messages on the Wall.
If you are offline, you receive an instant message as a missed event in the wall. Open the history of your contact to see the missed instant message.

II.6.3 During conversation

Send message.
Send emoticon.
Call the participant (audio answer).
Add a participant to the conversation.
Display the list of participants. From the list you can also open the contact card of a participant.
Drop a participant.
Exit session when you are the last one in the session.
Exit session when both parties are connected (menu android).
During the conversation, you can check information by consulting the Conversation Wall. Select the current conversation in the Conversation Wall to go back to the conversation screen.

During a conversation, export the text of the conversation by using the Android menu.

Export the text of the conversation.

From a group chat, if you want a private chat with one participant, you need to create a new IM session with only this participant.

II.6.4 Export an Instant Message

You can export the text of a conversation, to copy it into an email for example.

1. Export chat:
   - Use the Android menu during the conversation.
   - Use the copy icon when the conversation is ended (past even from conversation history).
   The content of the conversation is copied into the clipboard.

2. Paste the text into another application like email (long press on a text box).

Instant messaging feature can be deactivated by administrator if your system is using a third party instant messaging server.
II.7  Meeting

II.7.1  Create a meeting

Select the meeting tab.
Create a new meeting.
Select the type of meeting (scheduled or reservation less) and fill in the various appointment fields.
Define a recurrence pattern if required (none, daily, weekly, monthly)
Manage leaders and participants of the meeting.
   • Add a new leader/participant.
     A meeting leader can add or remove a participant, share a document, and cancel the meeting (depending on the OTC client).
     Remove a participant by a long press on it.
Manage a profile and password of the meeting.
   Choose a predefined profile for the meeting:
     • Meeting: use for interactive business meetings. All licensed features are available
     • Webinar: use for a Web presentation (large events). Participants only hear and see the Web presentation of leaders
     • Training: use for a teacher-student scenario. All licensed features are available. The session ends when the teacher hangs up (leader)
     • Conference call: use for a voice only conference.
   Secure access to the meeting
     • You can define a password for an audio meeting (digits only). In this case, an external user has to enter the password to join the audio meeting
     • You can define a password for an online meeting. In this case, an external user has to enter the password to join the web meeting.
     Depending on the system configuration, you may need to follow a password policy (consult the password policy).
Confirm the meeting.

Scheduled meetings and non-reservation meetings are sorted by date in two separate sections.
II.7.2 Manage an existing meeting: send invitation, modify, delete

Future scheduled meetings are displayed on the conversation wall. Scheduled meetings and non-reservation meetings are sorted by date in two separate sections.

1. Open the meeting details from the conversation wall or the meeting tab.
   Subject, start and end dates, duration, recurrence if any, owner, participants (with leader and participant information), calling number and SIP URI information, Access code and password (optional) are displayed in this page. The URI is the network identifier of your caller's telephone. Numbers and SIP URI can be used to join the meeting.

2. From this page, you can:
   - Send an email containing all the information needed to join the meeting to invite additional people for example. As a leader, a pop-up about leader access code security will be displayed.
   - Modify a future meeting.
   - Delete a future meeting.

II.7.3 Start meeting

The badge becomes purple five minutes before the conference starts.

There are 3 ways to join a live conference:

- From the conversation wall, select the corresponding badge to join the conference.
- From the conference details, select the corresponding action at the bottom of the screen.
- From your email client, select the link in the invitation you have received by email.

From another set, dial directly the number or the SIP URI to join the meeting. Enter access code and password if necessary. Follow instructions.

Display the real-time list of participants during conference.
II.8 Smartwatch

You can use the OpenTouch Conversation with your smartwatch. You are notified directly on your smartwatch when you receive a new event. From your smartwatch, connected to a Bluetooth headset, you are able to:

- Answer an incoming call.
- Forward an incoming call to voice mail.
- Call back the last missed call from history.
- Play the last voice mail.
- Display the new instant message and call the contact of the message.
- Join a meeting.

II.8.1 Before using the smartwatch

Before using your smartwatch, your smartwatch has to be paired with the smartphone running the OpenTouch Conversation application. ‘Android Wear – Smartwatch’ application has to be downloaded on smartphone. You smartphone and smartwatch have to be synchronized.

1. Open your OpenTouch profile (sliding menu).
3. Open settings: User preferences
4. Select the smartwatch option

   ![Smartwatch option enabled]

   This icon is displayed on user banner when smartwatch option is enable.
II.8.2 Receiving a call

Answer the call.

Forward an incoming call to voice mail.

II.8.3 Missed calls

Select the notification on the smartwatch to open the list of missed calls.

Call back the last missed call.

II.8.4 Voice mail

Play the last voice mail.

II.8.5 Instant messages

Call the sender of the instant message.

Exit the conversation.

II.8.6 Meeting

When you are invited to a new scheduled/reservationless meeting, you are notified on your smartwatch.

When the scheduled/reservationless meeting starts, you are notified on your smartwatch.

Open the details of the meeting.

Join the meeting.

III.8.6 MEETING
III.1 Start OpenTouch™ Conversation

III.1.1 Start the application

Select the OpenTouch Conversation Icon.

Tip: create an OpenTouch Conversation shortcut on your homepage.

III.1.2 Sign in

When you connect for the first time, if you have not configured the connection parameters (OpenTouch settings), a login configuration window is displayed to enter the OpenTouch credentials and OpenTouch server address.

1. Set your connection parameters.
2. Enter your user name (login) / Password (OpenTouch user password).
3. Sign in.
4. In the initial login screen you can see the 'Scan QR Code' button (when necessary, hide the input keyboard). When you press this button, the application scans the QR Code image sent by your system administrator. The application then automatically configures the connection parameters (the number of parameters provided depends on your security policy).

III.1.3 Sign out

Open your OpenTouch profile (sliding menu).

Sign out.
III.2 Settings

III.3 Homepage

III.3.1 Homepage description
1. My profile: settings and information about the user.
2. Display of all conversation logs. 
   Display of missed conversations (filter).
   Display of callback requests
3. Tab.
   Access features by selecting the dedicated tab:
   - Conversation wall.
     The number of new events is displayed.
   - Contacts and favorites.
   - Dialer.
   - Voicemail access.
     You have unread voice messages (the number of unread messages is displayed).
   - Meeting.

III.3.2 Conversation wall
Conversation Wall contains the history of all your conversations.

The Wall is divided into 4 parts:
4. Future meeting if managed by your system
5. Conversation in progress.
6. Callback requests
7. Past conversations.
   All conversations are sorted by date: today, yesterday, this week, last week and before.

How to understand the conversation wall:
Each item represents a conversation log by user, by time slot and by the corresponding number of unread events.
- Red badge: missed or new events.
- Purple badge: ongoing conversation.
- Grey badge: past event.
- Black badge: future event (meeting).
- Conversation.
- Visual Voice Mail.
- Instant messages.
- Meeting.
- : This icon indicates a contact from the local directory of the mobile.
- : This icon indicates a favorite contact.

The colored bar under the avatar shows the contact's presence status.

The action on a contact depends on how you select it.
1. Select the badge to direct call the displayed number.
2. If you select an unread event, you open the history card directly.
3. If you select a read event, you put your contact on the stage.
4. To display only new missed calls, select the appropriate filter.
5. Select the current conversation in the homepage to go back to the conversation screen.

III.3.3  To delete one conversation log
You can delete a conversation log if it is acknowledged.

1. Long press on the item.
2. 🗑️ Delete the conversation log.

III.3.4  To acknowledge a missed call
A conversation log is acknowledged if all events for that item are acknowledged.

If an item is marked as a missed event, you can acknowledge the event.

1. Long press on the item.
2. ✅ Acknowledge the event.

A single event is automatically acknowledged when consulting.

III.3.5  To delete all conversations in the wall

1. Press the Android menu button.
2. Delete all conversations.
3. Confirm the deletion.
### III.3.6 Status icons

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Icon" /></td>
<td>Application is connected and fully available. Consult the notification bar to identify the issue.</td>
</tr>
</tbody>
</table>

Call in progress.
Missed calls.
new voice message(s).
New instant message(s).
Callback requests

### III.3.7 Call Routing

#### III.3.7.1 Select your routing profile

The call routing profiles displayed depend on your configuration and installation (main phone and other registered devices)

1. Open your OpenTouch profile (sliding menu).
2. Open the routing profile management.
3. Incoming call
   Select which devices will ring when you receive an incoming call.
   For example, select a profile between:
   - Deskphone and mobile
   - Deskphone
   - Personal Computer and mobile
   - Personal Computer
   - Home phone and mobile
   - Home phone
   - Other phone and mobile
   - Other phone

4. Immediate forward:
   - Immediate forward to voicemail
   - Immediate forward to number
   - Immediate forward

5. Apply.

A specific icon is displayed on the wall when you select an immediate forward.

*If you selected a routing profile with mobile not ringing, a specific status icon is displayed.*
III.3.7.2 Define numbers

Select or define a number to forward your calls on to.

1. Select the edition mode.
2. Enter a phone number then apply.
3. Check that the corresponding profile is selected.
4. Apply.

III.3.7.3 Define user

Select or define a user to forward your calls on to.

1. Select the edition mode.
2. Select a user in the search result.
3. Check that the corresponding profile is selected.
4. Apply.

III.3.8 Change routing profile via QR code or NFC tag

You can modify your current ringing call routing profile with any internal deskphone which is prepared with QR code or NFC tag. You can find a QR code or NFC tag in a meeting room for example. One hour after the routing change, the application will prompt the user to keep this configuration or get back to the initial routing state.

You are facing the QR code or the NFC tag of the internal deskphone.

1. Open your OpenTouch profile (sliding menu).
2. Open the routing profile management.
3. Define the new internal number by using one of the following:
   - Scan QR Code
   - Tap the NFC tag with your smartphone.
4. Apply.

Your incoming calls will ring on this new deskphone.
III.3.9 **Presence**

The colored bar under the avatar shows the contact's presence status.

- Available
- Busy
- Be right back
- Appear Offline

The OpenTouch Conversation presence status of your contact can be augmented with the Outlook calendar presence (Exchange – depending on the system). The calendar presence of your favorite contact is displayed in the contact card when she/he is in an Exchange meeting with status Free, Working Elsewhere or Tentative so that I know if I can call her/him.

**Change your presence status**

1. Open your OpenTouch profile (sliding menu).
2. Access to the presence feature.
3. Change your presence status.
4. Apply.
### III.3.10  Contact card

A contact card represents a person. Open a contact card by selecting a contact in the conversation Wall or in your favorites. A card contains 3 pages.

- **Page 1** is the conversation history with this contact.
- **Page 2** is the contact on the stage. The default number used to make a call is the business number (action in gray is not available). The color bar under the photo shows your contact's presence status (Available, Be right back, Busy, Appear Offline). The Microsoft Outlook calendar presence (Exchange) of a favorite contact, when available, is displayed in this page (depending on the configuration of the system and the settings of your contact account).

  - Make a call with the default business number
  - Send instant message
  - Send SMS
  - Send e-mail
  - Make a call with the mobile number

- **Page 3** is the contact details.

- Swipe right and left to navigate between the 3 pages.

**From the conversation history page:** you can acknowledge or delete an event or call the contact.

1. Press on the item.
2. Delete the conversation log.
3. Acknowledge the event.
4. Call back the contact.
III.3.11  **Favorites**  
Favorites give you faster access to your preferred contacts.

1. 🔄 Open your contact tab.  
   Your favorite contacts are displayed.  
   Favorites give you faster access to your preferred contacts.

2. Open a contact card.

3. 📞 Press the call icon to call your contact.

4. Search for a contact in your local contacts or in a corporate look-up by using the search interface.

TTY: This icon indicates a contact from your local directory.  
🌟: This icon indicates a favorite contact.

If you have other OpenTouch Conversation clients, the same list of favorites is displayed for each client.

III.3.12  **Search a contact**  

1. 🔄 Open your contact tab.

2. Enter the name of your contact.

3. From the search result, select the contact you are searching for.

4. 📞 Call your contact.

If the contact is not in your local directory, you can save them as a new local contact.
  - Open the contact card.
  - Press the Android menu button.
  - Add the contact to your local directory.

The search runs immediately on local contacts (predictive search). You can base your search on 2 strings for better results.  
To perform a corporate look-up, select the specific search button.
III.3.13 Add or remove the selected contact to your list of Favorites

Open the contact card of the caller you want to add or remove to your favorites.

- Add the contact to your favorites list.
- Remove the contact from your favorites list.

III.3.14 Visual Voice Mail

1. You have unread voice messages (the number of unread messages is displayed).
2. Open your visual voicemail.
3. Select the message to listen to.
4. From the selected message you can:
   - Move the cursor along the play bar to go forward or backward in the message.
   - Pause or resume the message.
   - Activate/deactivate loudspeaker.
   - Delete the message.
5. Customize your voice mail.
6. Press the Android menu button:
   - Delete all read messages.
   - Calling voice mail.
III.4 Conversation

III.4.1 Set up a conversation with a contact
- You can make a call from the conversation wall, visual voicemail tab, instant messaging tab or a scheduled meeting, if available on your system.
- You can make a call from a search on your local contacts or from a corporate look-up.
- You can make a call from the contact card (details or history).

How to set up a conversation with a contact:
1. Call directly using the displayed phone number.
2. Use different types of media for conversation (if available).
3. Call using a specific phone number from the contact card.

III.4.2 Make a conversation by entering a number
1. Open the keypad.
2. Enter your caller’s number.
3. Make the call.

Copy/paste is available from the keypad. You can add the number you entered to the local directory of your mobile (new or existing contact).
III.4.3 **Make a private call**

If you enable the private call option in the OpenTouch Conversation configuration, when you make a call by dialing the number from the native dialer of your mobile phone, a popup lets you choose to make a business or a private call.

Use one of the following:
- If you enable the private call option in the OpenTouch Conversation configuration, when you make a call by dialing the number from the native dialer of your mobile phone, a popup lets you choose to make a business or a private call.
- Long press on the phone number allows you to make a private call.

III.4.4 **Dial from your mail device (one-shot)**

This feature provides the capability to launch a single call from your main device. When the conversation is ended, the routing profile automatically returns to its previous state.
- Long press on the phone number to call
- **Dial from**
- **Main device**

If you enable the private call option in the OpenTouch Conversation configuration, this feature is available with the native dialer.

III.4.5 **Receiving a conversation**

Incoming call screen of the OpenTouch application, is displayed only if the corresponding setting is active. Otherwise, the default Android screen is used.

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Answer the call.</td>
<td><img src="image" alt="Answer the call" /></td>
</tr>
<tr>
<td>Forward an incoming call to voice mail.</td>
<td><img src="image" alt="Forward to voice mail" /></td>
</tr>
<tr>
<td>Decline the call with an instant message.</td>
<td><img src="image" alt="Decline call" /></td>
</tr>
<tr>
<td>Transfer the call to another pre-defined phone number(s) (colleague, home, …). Contact your system administrator to add new number(s).</td>
<td><img src="image" alt="Transfer call" /></td>
</tr>
</tbody>
</table>

If you receive a call while your phone is locked, a pop-up is displayed on the page.

III.4.6 **Audio media switch from your deskphone to your smartphone via NFC**

During an active call, capability to switch the audio media from your deskphone to your smartphone via a NFC sticker located inside/on your deskphone.
### III.5 During conversation

#### III.5.1 Screen description

<table>
<thead>
<tr>
<th>You are in conversation with one contact.</th>
<th>You are in a call with two contacts (hold or conference).</th>
</tr>
</thead>
</table>

#### III.5.2 Make a second call / Switching between two calls / Transfer call to your contact on hold / Three-party conference / Send DTMF

<table>
<thead>
<tr>
<th>End the active call. Leave the conference (the call is still active with the other participants).</th>
<th>![End call icon]</th>
</tr>
</thead>
<tbody>
<tr>

<td>![Conversation Wall icon]</td>
</tr>
<tr>
<td>Send DTMF.</td>
<td>![Send DTMF icon]</td>
</tr>
</tbody>
</table>
III.5.3 **Media switch via QR code and NFC tag**
When you are in conversation, you can switch the active audio media from your smartphone to any internal deskphone prepared with QR code or NFC tag. You can find a QR code or NFC tag in a meeting room for example. You can use this feature to isolate you in a meeting room. When the conversation is ended, the routing profile automatically returns to its previous state.

During a conversation, you are facing a QR code or the NFC tag of the internal deskphone. Define the new internal number by using one of the following:
- Tap directly the NFC tag with your smartphone.
- Divert the incoming voice call by scanning the QR code.

III.5.4 **Receiving a second call (according system configuration)**
During a conversation, another person is trying to call you. Name or no. of the caller displayed for 3 seconds. You are alerted by a notify ringtone (native notify ringtone defined in Android settings).

<table>
<thead>
<tr>

</tbody>
</table>
III.6 Instant Messaging

III.6.1 Start an instant message
An instant message is a type of conversation which offers real-time text transmission with your contact.

You start an instant message like other conversation from a contact card.

III.6.2 Receive an instant message
If you are online, you receive instant messages on the Wall.
If you are offline, you receive an instant message as a missed event in the wall. Open the history of your contact to see the missed instant message.

III.6.3 During conversation

| Send message. | ↩️ |
| Send emoticon. | 😁 |
| Call the participant (audio answer). | 📞📞 |
| Add a participant to the conversation. | 🌐 |
| Display the list of participants. From the list you can also open the contact card of a participant. | 🌐 |
| Drop a participant. | ⤷ |
| Exit session when you are the last one in the session. | ✖️ |
| Exit session when both parties are connected (menu android). | ✖️ |
During the conversation, you can check information by consulting the Conversation Wall.
Select the current conversation in the Conversation Wall to go back to the conversation screen.

During a conversation, export the text of the conversation by using the Android menu.

Export the text of the conversation.

From a group chat, if you want a private chat with one participant, you need to create a new IM session with only this participant.

### III.6.4 Export an Instant Message
You can export the text of a conversation, to copy it into an email for example.

2. Export chat:
   - Use the Android menu during the conversation.
   - Use the copy icon when the conversation is ended (past even from conversation history).

The content of the conversation is copied into the clipboard.

3. Paste the text into another application like email (long press on a text box).

Instant messaging feature can be deactivated by administrator if your system is using a third party instant messaging server.
III.7 Meeting

III.7.1 Create a meeting

Select the meeting tab.

Create a new meeting.

Select the type of meeting (scheduled or reservation less) and fill in the various appointment fields.

Define a recurrence pattern if required (none, daily, weekly, monthly)

Manage leaders and participants of the meeting.

- Add a new leader/participant.
  A meeting leader can add or remove a participant, share a document, and cancel the meeting (depending on the OTC client).
  Remove a participant by a long press on it.

Manage a profile and password of the meeting.

Choose a predefined profile for the meeting:
- Meeting: use for interactive business meetings. All licensed features are available
- Webinar: use for a Web presentation (large events). Participants only hear and see the Web presentation of leaders
- Training: use for a teacher-student scenario. All licensed features are available. The session ends when the teacher hangs up (leader)
- Conference call: use for a voice only conference.

Secure access to the meeting
- You can define a password for an audio meeting (digits only). In this case, an external user has to enter the password to join the audio meeting
- You can define a password for an online meeting. In this case, an external user has to enter the password to join the web meeting.

Depending on the system configuration, you may need to follow a password policy (consult the password policy).

Confirm the meeting.

Scheduled meetings and non-reservation meetings are sorted by date in two separate sections.
III.7.2 Manage an existing meeting: send invitation, modify, delete

Future scheduled meetings are displayed on the conversation wall. Scheduled meetings and non-reservation meetings are sorted by date in two separate sections.

1. Open the meeting details from the conversation wall or the meeting tab. Subject, start and end dates, duration, recurrence if any, owner, participants (with leader and participant information), calling number and SIP URI information, Access code and password (optional) are displayed in this page. The URI is the network identifier of your caller’s telephone. Numbers and SIP URI can be used to join the meeting.

2. From this page, you can:

   - Send an email containing all the information needed to join the meeting to invite additional people for example. As a leader, a pop-up about leader access code security will be displayed.
   - Modify a future meeting.
   - Delete a future meeting.

III.7.3 Start meeting

The badge becomes purple five minutes before the conference starts. There are 3 ways to join a live conference:

- From the conversation wall, select the corresponding badge to join the conference.
- From the conference details, select the corresponding action at the bottom of the screen.
- From your email client, select the link in the invitation you have received by email.

From another set, dial directly the number or the SIP URI to join the meeting. Enter access code and password if necessary. Follow instructions.

Display the real-time list of participants during conference.
You can use the OpenTouch Conversation with your smartwatch. You are notified directly on your smartwatch when you receive a new event. From your smartwatch, connected to a Bluetooth headset, you are able to:

- Answer an incoming call.
- Forward an incoming call to voice mail.
- Call back the last missed call from history.
- Play the last voice mail.
- Display the new instant message and call the contact of the message.
- Join a meeting.

### III.8.1 Before using the smartwatch

Before using your smartwatch, your smartwatch has to be paired with the smartphone running the OpenTouch Conversation application. The Android Wear – Smartwatch application has to be downloaded on smartphone. You smartphone and smartwatch have to be synchronized.

1. Open your OpenTouch profile (sliding menu).
3. Open settings: User preferences
4. Select the smartwatch option

This icon is displayed on user banner when smartwatch option is enable.
III.8.2 Receiving a call

Answer the call.

Forward an incoming call to voice mail.

III.8.3 Missed calls

Select the notification on the smartwatch to open the list of missed calls.

Call back the last missed call.

III.8.4 Voice mail

Play the last voice mail.

III.8.5 Instant messages

Call the sender of the instant message.

Exit the conversation.

III.8.6 Meeting

When you are invited to new scheduled/reservationless meeting, you are notified on your smartwatch.

When the scheduled/reservationless meeting starts, you are notified on your smartwatch.

Open the details of the meeting.

Join the meeting.
