Predictable expenses

Subscription-based models provide [predictable monthly costs](#), allowing businesses to budget more effectively.

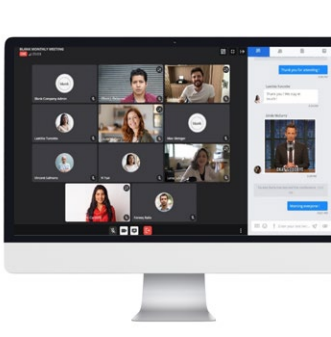

Don't leave anymore money on the table with your current communication strategy, choose Rainbow

52%+
Workplace productivity boost

2.6X
faster compared to traditional communications systems

70 minutes
saved per employee daily

60%+
Integrated platform efficiency

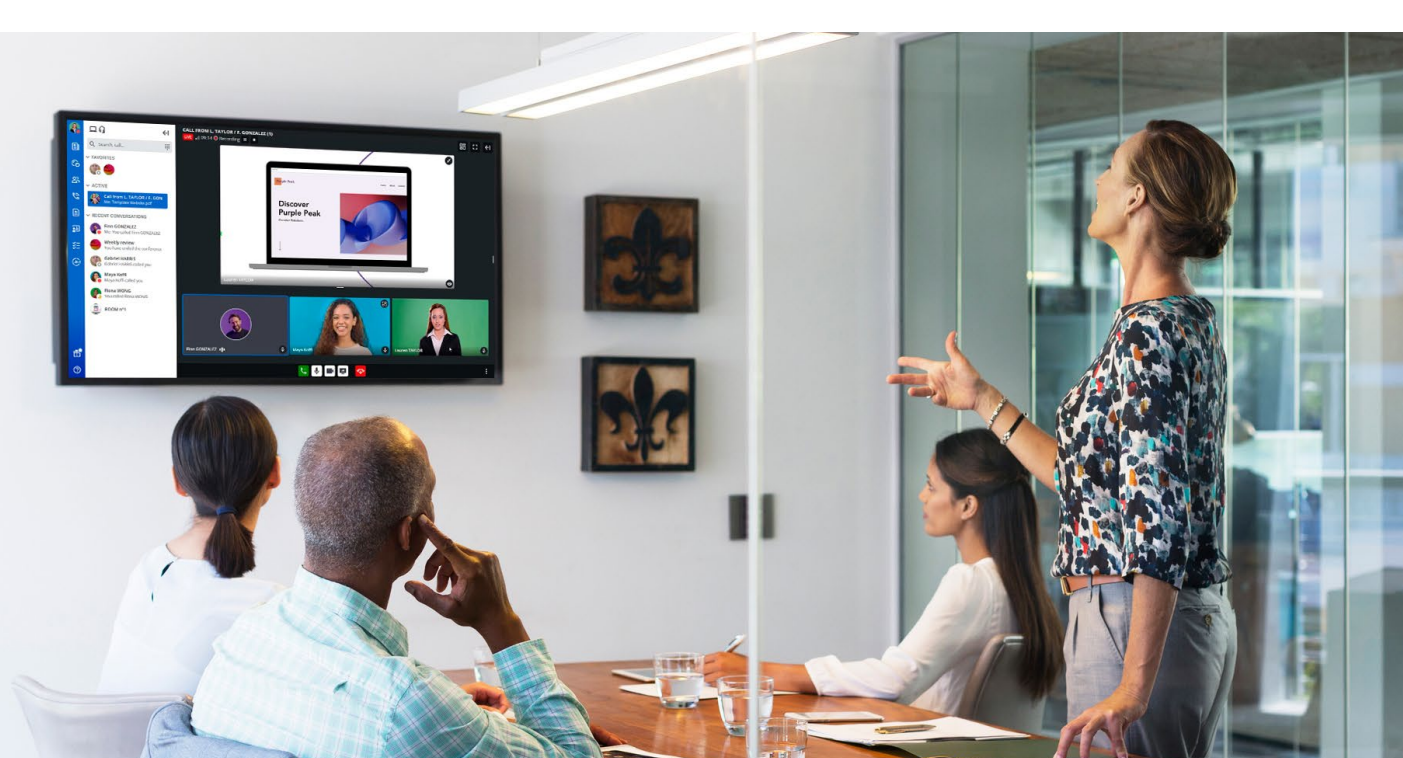

Dual power: AI & Advanced compliance

Meet smarter and engage deeper

- 100% business calls handling rate through smart routing
- Improved collaboration
- Save time and better engage people during and after meetings

UCaaS solution follows the strictest regulatory compliance requirements:

- GDPR protects individuals' personal data by regulating its collection, processing, and storage, ensuring privacy and security.
- HIPAA a U.S. law that protects sensitive patient health information by setting standards for its privacy, security, and confidentiality.
- ENS a Spanish cybersecurity framework that establishes security standards for protecting public sector information systems and data. 
- CSPN evaluating the security of IT products through a streamlined assessment process, a French cybersecurity certification issued by ANSSI. 
- The BSI C5 defines a baseline security level for cloud computing and supports customers in selecting, controlling and monitoring their cloud service providers.
