

Rainbow™ by Alcatel-Lucent Enterprise:

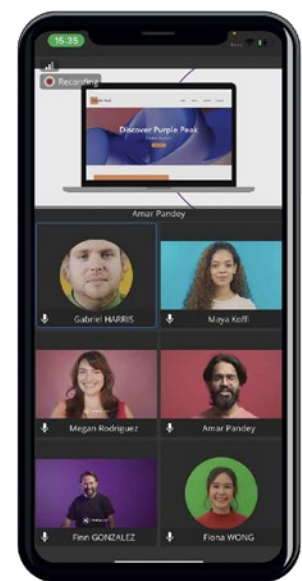

Your office, in your smartphone

Simple, secure and accessible, wherever you are

Available on **iOS** and **Android**, **Rainbow™ by Alcatel-Lucent Enterprise** extends your work environment beyond the office. Business telephony, **instant messaging**, **audio or video calls**, **meetings**, **webinars** and **file sharing**: all your communication and collaboration features are at your fingertips in a smooth and secure application.

Total continuity between desktop and mobile

- Benefit from a **single business number** to ensure high-quality call handling, even on mobile
- **“Conversation pickup”** feature allows you to instantly continue a conversation started on your computer or another device
- Switch easily from one device to another with **multi-device management**
- Instantly find your conversations, calls and meetings, **on any of your devices**
- Centralize your services (**collaboration**, **telephony**, **webinars**, **alert system**) while maintaining consistent management and administration

Smart mobility designed for active professionals

- Optimized **4G**, **5G** or **Wi-Fi** connection for consistent communication quality
- **Real-time notifications** so you never miss an important message, call, or appointment
- Push notifications when your smartphone is in standby mode
- Integration with the smartphone's **native** address book, contacts and **keypad** for faster, more natural calls
- Compatibility with **Apple CarPlay**, **Android Auto** and **Siri voice control** so you can stay connected safely while traveling for work
- Data security and sovereignty

Designed for business mobility, the app offers **end-to-end encryption** and **fully configurable privacy settings** from your device.

The platform relies on **certified and secure data centers**, ensuring the constant **availability**, **integrity** and **confidentiality** of your information.

Rainbow complies with **international security standards**, including **ISO 27001** and **CSPN** certifications issued by the **ANSSI** cybersecurity agency, attesting to ALE's commitment to the highest standards of corporate protection.

This approach guarantees that your exchanges remain **private**, **secure** and compliant with the most demanding standards, even when you are on the move.

Datasheet

Rainbow: Your office, in your smartphone
